DETAILED ACTION

Allowable Subject Matter

Claim 1-10 allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1 and 6 recite:

Said first engagement member and said second engagement member being mounted to said base so that both engagement members are movable both linearly, perpendicularly to a surface of said housing, and angularly, coincident with said surface of said housing;

A first torsion coil spring and a second torsion coil spring each having one end of the coiled part of the wire retained by said base and an other end resiliently movable in a direction perpendicular to the surface and in contact with one of the first or second engagement members in a manner to allow the engagement members to move both linearly and angularly.

The closest reference, Inoue (US Patent Number 6898795) discloses first and second engagement members, however, these engagement members cannot move angularly, coincident with said surface of said housing;

These limitations, in combination with the limitations of claims 2-5 and 7-10, are neither anticipated, nor rendered obvious by any prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
